EDUCATION

Bachelor Computer Science

Carleton University
Ottawa, ON | 2016

ACHIEVEMENTS

- Oversaw the launch and delivery of the President's Choice Financial project
- Presented a TEDx talk on the role of technology in the education space
- Published a paper in the ACM Digital library (presented as part of PROMOTO 2015)

TOP SKILLS

Angular, AngularJS, TypeScript, RxJS, NGRX, JavaScript, NodeJS, Express, SASS, CSS, MongoDB, SQL, WACG, Swagger, OpenAPI, Python, React Native

EXPERIENCE

Technical Lead Software Developer

President's Choice Financial (Intersect) | Toronto, ON | 2018 - PRESENT

- Created various reusable components and interaction flows
- Engineered form based applications using reactive form resulting in an increase in conversion rate for credit card applications
- Set up integrations with backend through swagger contracts using RxJS and reactive state management using NGRX
- Served as a liaison between development team and stakeholders including product owners and other vendors.
- Provided technical guidance and onboarding to developers, and conducted code review.
- Ran scrum ceremonies including stand-ups, planning and backlog refinement

Full Stack Software Developer

Filament Creative | Toronto, ON | 2018

- Developed client projects in a creative agency environment using a variety of technologies including Angular 5, React Native, CSS Grid, Flexbox and JavaScript
- Crafted reusable components using Angular from user designs and client input
- Researched and layed out groundwork for porting an existing iOS swift based app to a new React Native architecture

UI/UX Developer

Espial | Ottawa, ON | 2016 - 2017

- Developed various front-end and middleware components in proprietary JavaScript framework
- Crafted a RESTful API using NodeJS and Express to communicate between STB video players and Amazon Alexa video skill APIs
- Ported and adjusted various components from other company projects to a new architecture and hardware

Software Developer

Irdeto | Ottawa, ON | 2016

- Developed reusable web components using AngularJS directives from static mock ups provided
- Abstracted legacy XMLRPC APIs through a Python Flask framework
- Engineered a RESTful API using the MEAN stack to aggregate data from a MySQL database into a central portal
